INTRODUCTION

Dear Community, Judges and Tron team, let us start this presentation by asking you some simple questions. As Web3 and crypto users, how many platforms are you using everyday to discover new projects, to stay up-to-date with the latest novelties, to follow your favorite tokens price action, to have a look at tokens contracts, distributions and recent transactions? How many platforms do you use to stay up to date with projects' latest announcements, take informed trading decisions and execute them? What if we tell you, right here right now, that from today, you will be able to do all of this in a single place.

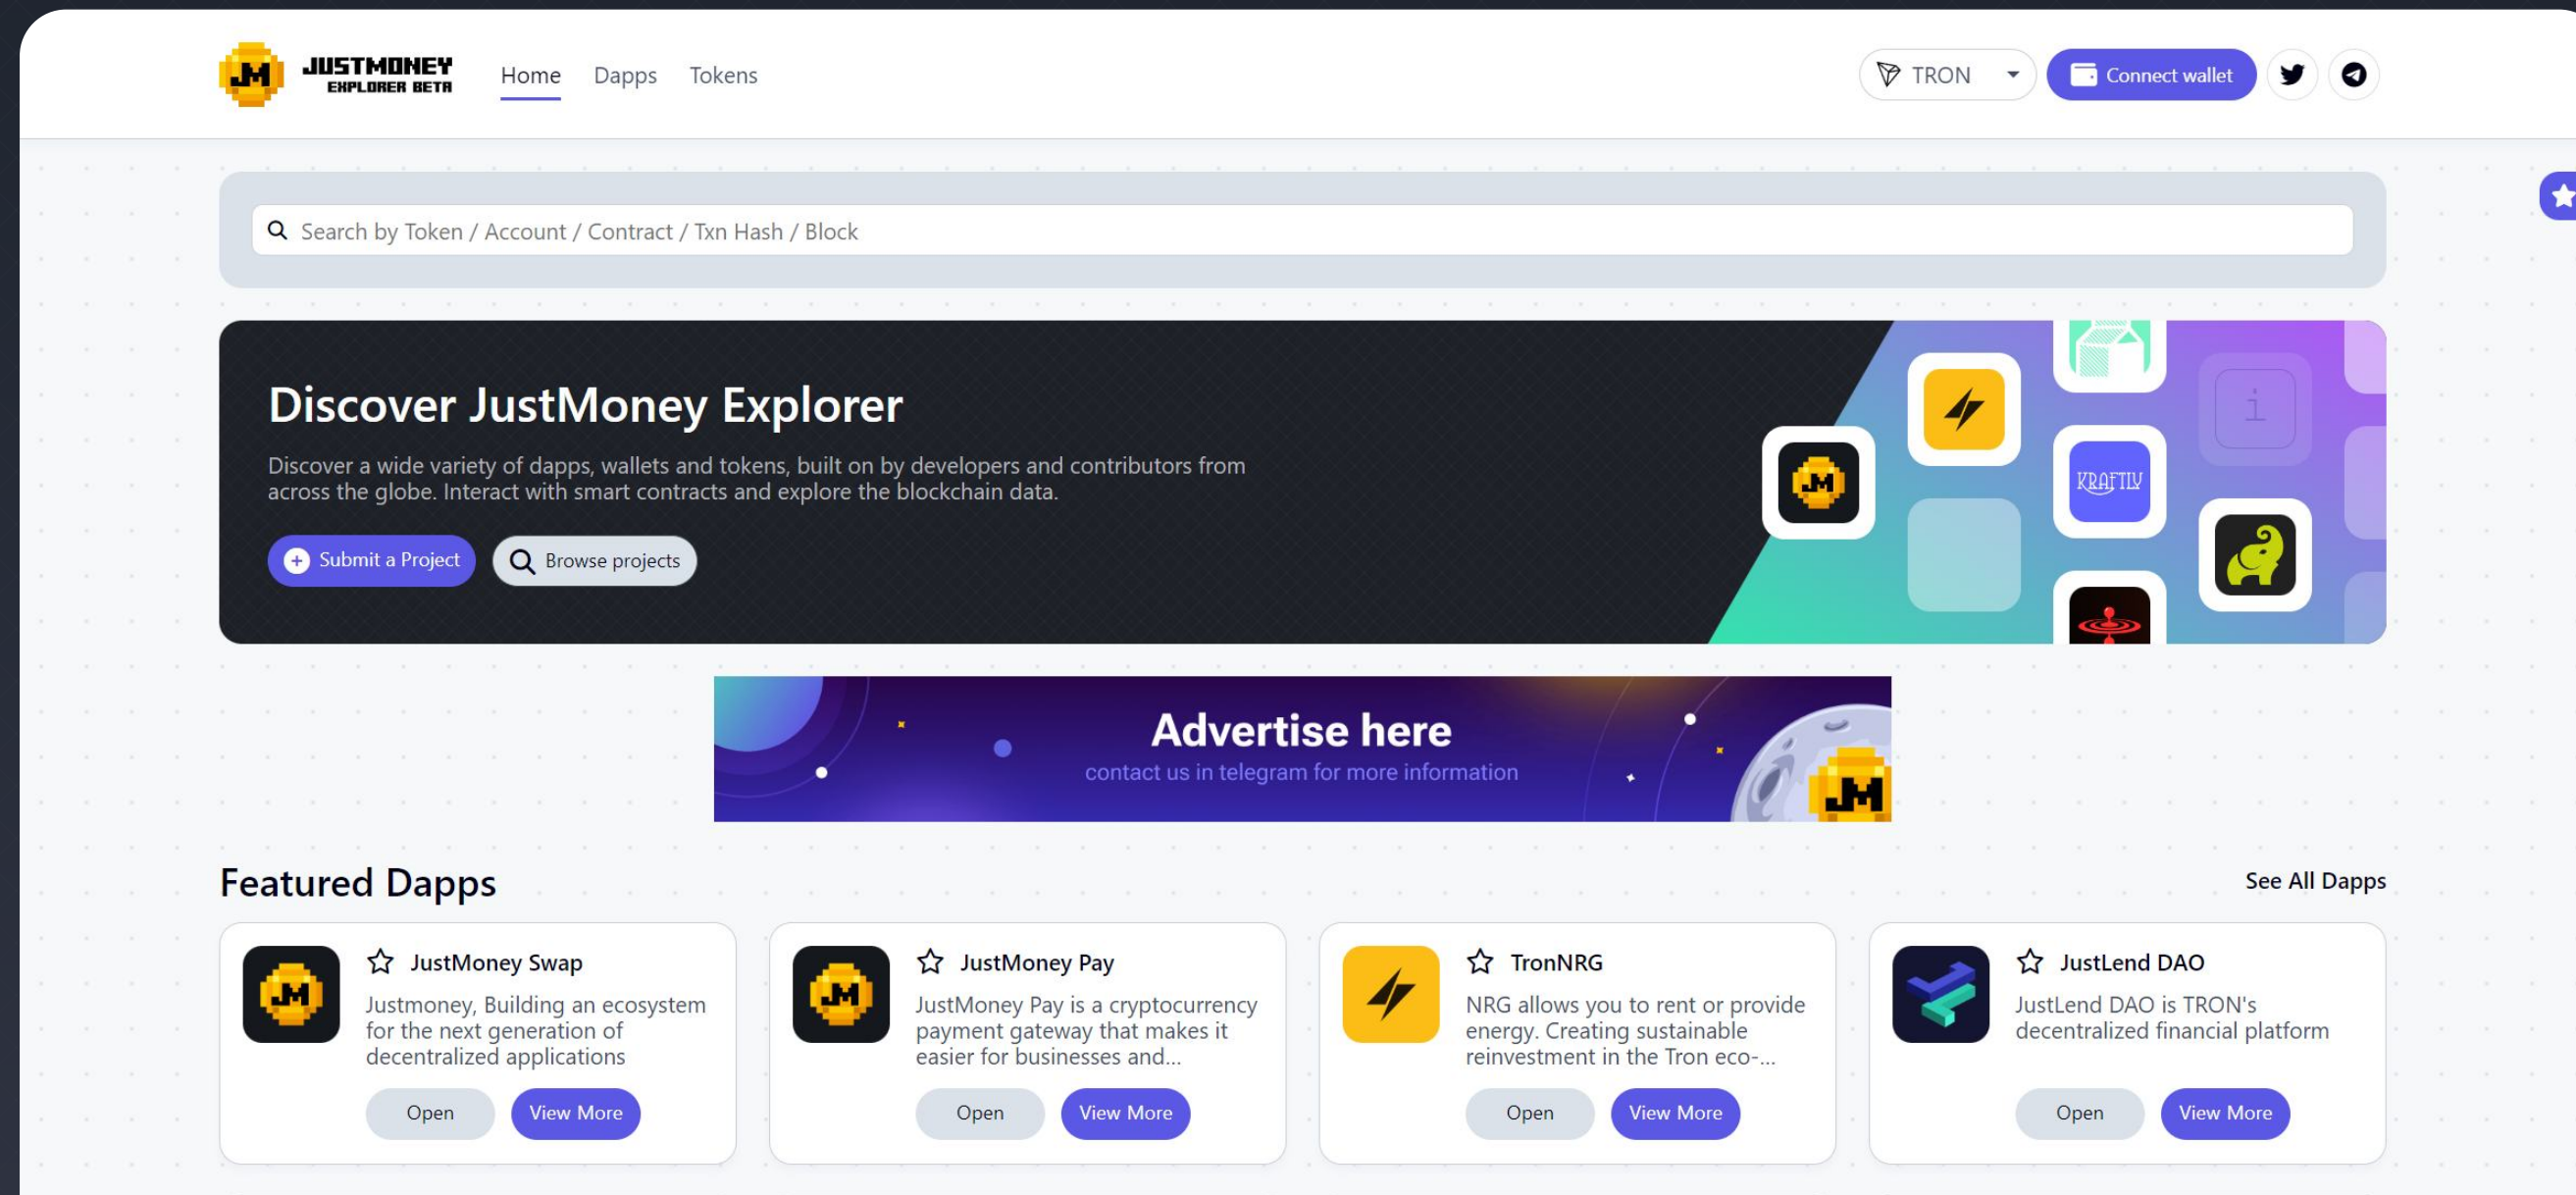

Dear Community, Judges and Tron team, we are excited to introduce our latest product to you: JustMoney Explorer, a dynamic new addition to the JustMoney Ecosystem. This innovative platform brings you all the advantages of a blockchain explorer, a DEX viewer (like Dextools for instance), and a dAppstore in just one place! It offers a comprehensive solution where projects can list their dApps and users can effortlessly navigate and interact with them.

INSPIRATION

Our source of inspiration is our Community and our own experience, not only as builders but also as users. Who has never struggled, jumping from tab to tab and from window to window to access the necessary information about Web3 projects and cryptocurrencies? Based on this experience and on the input we could get, we have decided to create a brand new all-in-one solution that provides the crypto community with an enjoyable and fluid navigation in the world of Web3 data.

WHAT IT DOES

BLOCKCHAIN EXPLORER

- Search for dApps, tokens, contracts, addresses, and transactions.
- View balances, transactions, and detailed information for contracts, addresses, and tokens.
- Execute read and write functions on contracts.
- Favorite contracts, tokens, and addresses for quick access.
- Explore a curated token list including featured tokens, meme tokens, and recently launched tokens.
- Engage with integrated advertising options, such as banners.

Bitcoin

Bitcoin uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of bitcoins is carried out collectively by the network. Bitcoin is open-source; its design is public, nobody owns or controls Bitcoin and everyone can take part. Through many of its unique properties, Bitcoin allows exciting uses that could not be covered by any previous payment system.

Only the top trading pairs in terms of liquidity are shown.

TOKEN (DEX VIEW)

- Access a dedicated token page featuring charts and direct swap options.
- Swap any token directly from its page at discounted fees of 5-19 TRX, applicable even for pools exclusive to Sunswap.
- View charts for pools paired with USDT or TRX (with dropdown options for other pairs).
- Participate in community rating of tokens and view basic information such as market cap, price, supply, and holder count.
- List of markets showcasing pools on JustMoney and Sunswap.
- Browse token holders, including a detailed breakdown of holdings.
- Anticipate new features like automatic contract scanning for safety and vulnerabilities, including alerts for high-risk tokens.

Token page with chart, swap and markets (dexes) where the token is traded

DAPP STORE

- Discover dApps by categories, with featured dApps highlighted on the front page.
- View detailed dApp information, including community ratings, screenshots, and more.
- List and modify dApps by submitting information and images through a form.
- Search for dApps by keywords and explore social media feeds directly from the dApp's page.

NRG & community DAO on Tron

FEATUREDDEFIINFRA

Tron energy exchange

ows you to rent or provide energy. Easily buy and
energy through the NRG & community DAO,
s users govern.

TRON

TronNRG

TRONNRG.COM

Tron energy rental service NRG that allows users to save on Tron transaction fees by renting energy! Users who provide energy benefit from receiving 70% of the rental fee while providing a low-cost service. Furthermore, from the end of Q4 2022, 10% of all rental fees are sent to the community DAO, allowing providers to vote on funding for Tron project proposals. The sharing economy meets perpetual crowdfunding on the Tron blockchain.

HOW WE BUILT IT

In order to make the idea of this platform a reality, we had to integrate with several pre-existing solutions. Here is a list of the APIs we've used:

- Tronscan API
- Sunswap Contracts
- JustMoney's API and widgets
- Tron RPC API

CHALLENGES WE RAN INTO

The difficulty while building this platform was to pull data from several sources and arrange them in a coherent and intuitive structure to provide users with the best UI/UX. The challenge was to bring a wide variety of information while paying attention to keep a simple and clear structure for a smooth navigation between pages and on every page.

ACCOMPLISHMENTS WE ARE PROUD OF

JustMoney Explorer is not just a product; it's a testament to the power of community-driven innovation and technological excellence. Since its inception, we have reached several key milestones that underscore our commitment to enhancing the blockchain experience:

- **Unified Platform Development:** Successfully developed and launched a comprehensive platform that integrates blockchain exploration, token analytics, and dApp interaction all in one. This was a major technological feat given the complex nature of the data and functions involved.
- **Community Engagement and Growth:** Our platform has been warmly received by the community (beta testing group). The feedback has been overwhelmingly positive, reinforcing our direction and approach.
- **Strategic Partnerships:** Established key partnerships with some blockchain players like Cred Shields, enhancing the functionality of our platform with high-quality data.
- **Innovation in Blockchain Safety:** Introduced features like automatic scanning of contracts for safety and vulnerabilities, setting a new standard in blockchain security practices and providing our users with peace of mind.

WHAT WE LEARNED

The journey of developing JustMoney Explorer has been incredibly enlightening, presenting our team with numerous learning opportunities:

- **User-Centric Design is Key:** Through continuous interaction with our community, we learned that the simplicity and intuitiveness of a platform are as important as its technical capabilities. This has led us to consistently refine our UI/UX to ensure that it meets the needs of both novice and experienced users.
- **Importance of Scalability:** As our platform grew, so did the need for scalability. We learned to anticipate growth and prepare our infrastructure to handle increasing loads, ensuring smooth and uninterrupted service.
- **Feedback is Invaluable:** Regularly engaging with our users (beta test group) for feedback has been crucial. It not only helps in identifying areas of improvement but also in understanding what features are most valued by our community.
- **Adapting to Rapid Changes in Blockchain:** The fast-evolving nature of blockchain technology taught us to remain agile and adaptable, ensuring that our platform stays relevant and continues to meet the changing needs of the market.

WHAT'S NEXT FOR JUSTMONEY EXPLORER?

7th of April: Beta version of the explorer live on mainnet

25th of June: Tradingview charting integration on token pages

25th of June: Automatic scanning contracts for safety and vulnerabilities and caching the result
